

How to write questions in your PDF

Use this exact structure for every question. Keep labels bold if you want, but the words Answer: and Explanation: must appear as shown so import can read them.

1. Start each item with Q1. or Question 1: then the question text.
2. Next line starts with Answer: then the short answer.
3. Next line starts with Explanation: then more detail.
4. Leave one blank line before the next question.
5. Save / Export the document as PDF, then upload in Admin !' Import.

React Interview Questions

Beginner Level (Q1–Q15)

Q1. What is React?

Answer: React is a JavaScript library for building UIs with reusable components using JSX syntax.

Explanation: React creates interactive interfaces by breaking them into small, independent components and updating them efficiently.

Q2. What are Components in React?

Answer: Components are JavaScript functions or classes that accept props and return elements describing what to display.

Explanation: Like LEGO blocks, you build small self-contained pieces and combine them into complex user interfaces.

Q3. What is JSX?

Answer: JSX is a syntax that lets you write HTML-like code inside JavaScript. It is compiled to React.createElement() calls.

Explanation: JSX makes UI code more readable. Babel converts it so the browser can run the result.

Question 4: What is the difference between state and props?

Answer: Props are read-only data passed from parent to child. State is mutable data managed inside a component.

Explanation: Use props to configure a component. Use state when the data changes over time with user interaction.

Tip for Word / Google Docs

Type questions like the sample above !' File !' Save as PDF / Download as PDF !' upload on the Import page. You can also Preview parse before Import.
